

SYADEM

COLIBRI

The intuitive platform for optimised vaccination management

OVERVIEW

Colibri is a SaaS-based professional software developed by **SYADEM** to meet the operational needs of vaccination in vaccination centres, primary care facilities, occupational health services, and long-term care institutions.

Accessible from any device via a simple web browser, Colibri streamlines day-to-day workflows, ensures secure traceability of vaccination acts, and enhances the overall efficiency of immunisation campaigns.

KEY STRENGTHS

Modular architecture adaptable to each organisation

Compatible across devices (desktop, tablet, smartphone)

Real-time monitoring and analytics

Integrated **VADES** (Vaccine Decision Support System)

Interoperable with **DVR, NUVA, INSi**

100% web-based access, no installation required

AVAILABLE MODULES

CORE MODULES

- ✓ Consultations
- ✓ Patients
- ✓ Statistics
- ✓ Configuration
- ✓ Connection to a Master Patient Index
- ✓ Mentor (rapid vaccine assessment without data storage)

OPTIONAL MODULES

- ✓ Data import/export
- ✓ Event log
- ✓ Integrated calendar
- ✓ Stock management
- ✓ Clinical trial monitoring
- ✓ Billing

CORE FEATURES

TRACEABILITY & AUDITABILITY

- Timestamped action logs
- Structured, exploitable data for reports, audits, evaluations

AUTOMATED REMINDERS

- Email and SMS notifications
- Fewer missed appointments
- Improved adherence to immunisation schedules

STREAMLINED COMMUNICATION

- To patients: reminders, documents, consents
- To professionals: interdisciplinary coordination
- To institutions: integration with hospital information systems (HIS)

CENTRALISED PATIENT TRACKING

- History of vaccination acts and consultations
- Quick access to clinical background
- Enriched and interoperable medical record (linked with **DVR**)

VACCINE STOCK MANAGEMENT

- Monitoring of inbound and outbound stock
- Alerts for low inventory thresholds
- Unit-dose traceability (with DataMatrix scanning)

INTEGRATED CALENDAR

- View team availability
- Plan workforce schedules
- Manage immunisation sessions

VACCINE DECISION SUPPORT (VADES)

- Personalised recommendations based on official guidelines

SIMPLIFIED BILLING

- Invoice creation
- Payment tracking
- Export of financial reports

APPOINTMENT MANAGEMENT

- Simple or advanced scheduling
- Pre-appointment preparation: prescriptions, exams, documents
- Coordination of multi-provider workflows

CONNECTED ECOSYSTEM

Colibri is natively interoperable with:

- ✓ **DVR** (Digital Vaccination Record)
- ✓ **DVC** (Digital Vaccination Card)
- ✓ **NUVA** for structured vaccine coding

- ✓ **VADES**, for real-time, rule-based vaccine guidance
- ✓ **FHIR / HL7** standards, for integration with national HIS platforms
